Executive summary	1
Contents	1
Introduction	5
Study Objectives	10
Study Methodology	11
Chapter 1: Vision, Mission and General Objectives of Health Professions Education in the Kingdom of Saudi Arabia.	16
Introduction	17
Objectives of the Study	17
Selection of Participating Experts	18
Procedures	19
Analysis of the existing Situation of Undergraduate Health Education in the Kingdom of Saudi Arabia	21
I. The SWOT Analysis for Undergraduate Health Education	21
A. Elements of Strength	21
B. Elements of Weakness	22
C. Opportunities	23
D. Threats	24
II. Current Problems of Undergraduate Health Education and the Gap between the existing Situation and Expectations after 25 Years	25
1. Visual Planning Parameters	26
2. Thai Scale	29

III. Suggestions to Bridge the Gap between the existing Situation and the future Expectations	31
Vision, Mission, Values and General Objectives of Undergraduate Health Education in the Kingdom	41
Vision, Mission	41
Values	42
General Objectives of Undergraduate Health Education	42
Conclusion	44
Chapter 2: The Study of Suitability Undergraduate Health Education Outcomes in Terms of Numbers and Specialties for Market Needs and Development Plans.	45
Introduction	46
Objectives of the Study	46
Procedures	47
Study Limitations	48
Existing Status of the Health Workers in Governmental and Private Sectors	49
Existing Status of Students and Graduates	51
Population of the Kingdom of Saudi Arabia	55
Workforce of Health Professions Need to be introduced to Job Market	57
1. Physicians	59
2. Dentists	62
3. Pharmacists	64
4. Nursing	66
5. Applied Medical Sciences Specialties	68

Recommendations	71
Chapter 3: Suggestion of General Frameworks for Curricula and Study Plans	75
Introduction	76
Objectives of the Study	78
Procedures	78
The Cross Sectional Studies	80
First study: Educational environment of health colleges at King Saud University	80
Second study: Patients' perception on health practitioner's performance	89
Literature Review	97
I. Competencies and characteristics that the health practitioner should possess upon graduation	97
II. Basic contents of the curriculum	81
III. Curriculum Strategies	127
IV. Quality Assurance	138
V. Electronic Learning (e-Learning)	141
VI. Clinical Skill Laboratory in Medical Education	155
VII. Teaching & Learning	162
VIII. Principles and tools of Assessment	175
IX. Selection Criteria for Admission to Health Colleges	194
Conclusions and Recommendations	203
Chapter 4: Trends of Health Education in the Developed Countries and the Recommendation of Health Education in the Kingdom of	227

Saudi Arabia	
Introduction	228
Objectives of the Study	228
Procedures	228
Study Limitations	229
I. Nursing	230
II. Pharmacy	240
III. Medicine	254
IV. Dentistry	270
V. Applied Medical Sciences	283
Common Recommendations	287
Chapter 5: Practical Recommendations and conclusions, and Determining the Possible Strategic Choices for Some Major Issues Related to Higher Health Education	
310	
Introduction	311
I. The Size of Health Education Outcomes and Admission Capacity	312
II. Training Sites	322
III. Funding Higher Health Education	330
IV. Internal Efficiency	334
Executive Recommendations	336
The First stage (Basic pivots in the implementation of the future plan)	336
The second Stage (Developing Educational Environment and Study Plans)	338
The Subsequent Stage(s)	339
Study Teams	341
Appendixes	352
