

CLS 541 projects

Objective

To review the literature in a recent topic related to stem cell clinical applications and submit a written literature review report. Students are also required to present their work in the classroom.

Research topics

- 1- Stem cell therapy for diabetes.
- 2- Stem cells and cardiac repair.
- 3- Stem Cell–Based Therapies for Spinal Cord Injury.
- 4- Clinical applications of stem cells in liver disease
- 5- Stem cells and lung regeneration
- 6- Contribution of Stem Cells to Kidney Repair

Literature review guidelines:

- 1- The report should not exceed 3500 words.
- 2- Use Harvard style in referencing.
- 3- Use up-to-date references and avoid overdependence on one or two references.
- 4- Plagiarism will be dealt with according to University regulations.
- 5- Use double line spacing, font style TIMES NEW ROMAN and not less than font size 12 in the body text.
- 6- Proofread your work to avoid grammar and spelling errors.
- 7- For advice on writing literature review report, you may visit:
