

Course No. & Code	235	Course Title	Introduction to Computer Drawings
Units	3	Pre Requisite	Non
Hours (Credit /Contact)	2+2Studio	Level	Third

Course Objectives

The course's main objective is to introduce the students to computer aided design technologies that will develop the student's skills and abilities in presenting and finalizing the projects giving to him as part of the Architecture and Planning Departments' curriculum

Course Description

In this course, the student gains knowledge of the use of computer aided design technology. This is mainly achieved through teaching the student the advanced potentials of various programs, mainly AutoCAD 2006, in preparing accurate and high quality architectural and planning drawings. In addition, the course focuses on training the student other related programs, such as Photoshop and Power Point that enable him to present his ideas and concept in a professional manner.
