

## MY BOOKS:

### 1. Landscape Architecture in Saudi Arabia

Co-Authored with: Louis T. May

Publisher: Tihama Publications, Jeddah, Saudi Arabia

Edition: 1983

**ABSTRACT:** The book presents on a larger context, the landscape architecture in Saudi Arabia. It was the culmination of a four-year design process for Saudi Arabia's Ministry of Interior Housing Project, whose premise was a total landscape architectural design concept that considers the desert climate of the region as well as exemplifies the spirit of Islam in present-day Saudi Arabia. The book contains among others, ideas about landscape architecture that links past and the present, fosters continuity and change and preserve traditional values. It covers chapters on History and Order, about Space and Form, of Regional and Contemporary Landscapes in Saudi Arabia, of Islamic Influences on European Designs, a general discussion about the environment and closes with a chapter on Saudi Arabian Courtyards and Gardens.

### 2. Urban Design & Community Development in Saudi Arabia

#### A Case Study: Internal Security Forces Housing Project

Edited by Salman T. Al-Sedairy

Publisher: Ministry of Interior, Riyadh, Saudi Arabia,

1984.

**ABSTRACT:** This is a two-volume book that encapsulated the ambitious housing program for the Internal Security Forces of the Ministry of Interior. The book described the three-phased planning and implementation of the project over twenty sites throughout the Kingdom. It included chapters on Site Descriptions, Design Determinants – social, architectural heritage and physical features, as well as Planning Principles, and a detailed description of each site's master plans.

### 3. Large-Scale Construction Projects: Management, Design and Execution (Mitchell Professional Library) (Hard Cover)

by SALMAN T. AL-SEDAIRY (Author) ISBN 07 13451289

Publisher: B.T. Batsford Ltd., 4 Fitzhardinge Street, Portman Square, London

First Edition, 1985

**ABSTRACT:** The book presents methods equally applicable to large-scale construction projects being managed by staff from within the countries themselves, or by overseas consultants and contractors, or by a combination of both. The book outlines a system, based on latest techniques for managing large construction projects from inception to completion and subsequent maintenance and operation. The book ably examined the procedures in construction management from the fresh point of view of a client, particularly on the criteria used (by clients) in selecting contractors and consultants. It also gave some insights on contracts and tender procedures covering such essential aspects of project management as: methods of monitoring performance, project control systems, communication, design preparation, etc. The book is backed up by detailed diagrams giving graphic summaries of the techniques and procedures described.

# Landscape Architecture in Saudi Arabia

Co-Authored with: Louis T. May

Publisher: Tihama Publications, Jeddah, Saudi Arabia

Edition: 1983, 62 pages.

**ABSTRACT:** The book presents on a larger context, the landscape architecture in Saudi Arabia. It was the culmination of a four-year design process for Saudi Arabia's Ministry of Interior Housing Project, whose premise was a total landscape architectural design concept that considers the desert climate of the region as well as exemplifies the spirit of Islam in present-day Saudi Arabia. ## Table of Contents:

1. Introduction
2. History and Order
  - a. Regional Order
  - b. Urban/City Order
  - c. Linear Order
  - d. Cluster Order
  - e. Geometric Order
  - f. Gateways
  - g. Rooms
  - h. Gardens
3. Space and Form
4. Regional Contemporary Landscapes in Saudi Arabia
5. Islamic Influences on European Design
6. Environment
  - a. Climate
  - b. Soils
  - c. Water
  - d. Vegetation
  - e. Design Response
  - f. Shade & Protection
  - g. Soil Stratification
  - h. Irrigation
7. Saudi Arabian Courtyards and Gardens
  - a. Water
  - b. Movement
  - c. Texture
  - d. Pattern
  - e. Light and Color
