

Why Should I Study Statistics?

Introduction

Statistics ... the most important science in the whole world: for upon it depends the practical application of every other science and of every art; the one science essential to all political and social administration, all education, all organization based upon experience, for it only gives the results of our experience.

Statistical Thinking will one day be as necessary for efficient citizenship as the ability to read and write.

How does the Statistics Programmer work?

Statistics courses are designed not only for intending statisticians, but for all students to help them become better accountants, market researchers, psychologists, biologists, geographers, engineers and so on
