

أكتب Trigger ب PL/SQL مهمته يقوم بإعطاء الموظف زيادة مقدارها 0.05% في حقل ال comm، وذلك من الراتب المدخل، بشرط أن تكون وظيفته Analyst

```
create or replace trigger sales_comm before
```

```
insert or update on emp
```

```
for each row
```

```
when(new.job='ANALYST')
```

```
declare
```

```
mem_comm number(8,2);
```

```
begin
```

```
if:new.sal is not null or :new.sal !=0 then
```

```
mem_comm:=(:new.sal*0.05);
```

```
:new.comm:=mem_comm;
```

```
end if;
```

```
end;
```

```
=====
```

```
insert into emp
```

```
(ename,job,sal)
```

```
values
```

```
('sad','ANALYST',2000);
```

```
=====
```

```
insert into emp
```

```
(ename,job,sal)
```

```
values
```

```
('badr','prog',2000);
```
