

EdgCapture eCommerce Option

Extend credit card payment processing to the web

Processing credit card payment has become a way of life for newspapers. Advertising, circulation and new media departments are continually seeking ways to automate payment processing and integrate eCommerce programs into daily operations.

Now with the new EdgCapture eCommerce option, credit card transactions can be seamlessly and securely taken on your web site using the industry's leading payment processing system. Just as EdgCapture integrates with your advertising and circulation environments, real-time processing of web transactions can be added to your existing EdgCapture system.

KEY BENEFITS

- Powerful API for easy web site integration
- Enhanced security and data encryption
- Immediate reply to the customer
- Advanced fraud detection
- Robust TCP/IP connectivity
- All support issues handled directly
- Extensive reporting capabilities
- Supports multiple credit networks
- Secure logon and password

EdgCapture eCommerce Option

EdgCapture eCommerce Option

Consolidate sources of payment transactions

EdgCapture provides the building blocks needed to centralize the entire payment process at your newspaper. Its automated work flow environment is scalable to include the use of many EdgCapture clients. With the eCommerce Option, Web capabilities can now be added to advertising and circulation payment processing. Incorporating online payment volume can lower transaction processing fees, improving your bottom line.

Full service solution

Using EdgCapture as the core of your payment processing environment allows for the highest levels of credit management and control. We are committed to providing newspapers with fast and efficient management of all payments through one centralized source.

Our support team is fully trained to handle not only EdgCapture support, but all payment processing questions, independent of whether they originate with the merchant's bank, the credit network, or the settlement bank.
