

Evolutionary Trends of City Planning in the 21st Century

According to Infomedia Revolution

This research aims at tracing the evolution of what is so called 'Infomedia' from the early history until the moment, through investigating its impact on town and city planning. By a comparative analysis method of the three major cultural waves, it ends with some significant conclusions, which highlight the predicted changes in many concepts, (Time, Space, City and town Planning) in the 21st century.

Key Words: Communication, Infomedia, Interactive Media, Edge City, Compact City.
