Abstract. Muslims scientist make care for lineages in many ways. one of these scientist is Alhafez Ahmad bin Ali bin Hajr, you can see effect of this care in his works, specially Takreb Altahzeb book .

Takreb Altahzeb is an important reference for researchers and students. so, the target of this research to explain some differences in formation of lineages between Ibn Hajr book (Takreb Altahzeb) and other scientist. some cases between two books for Ibn Hajr .

The differences of formation can be multi forms and it's variety, for ex. (lineages , first names , last names , nick names ... etc.) so, I focus on lineages to be an example of differences in Ibn Hajr book, that's means researchers can't fully trust in this book and he should be compare with other references .

Total of lineages have difference in Takreb is (24):

- 1.(13) of them have difference in two books of Ibn Hajr .
- 2.(11) of them have difference between Ibn Hajr book and other reference .

The result of This research is :

- 1.(18) lineages , Ibn Hajr was wrong .
- 2.(1) lineage , Ibn Hajr is in the right side .
- 3.(5) lineages , between 1 and 2 , may be to forms is right .
