## **Department**

Anatomy

## **About us**

The Department of Anatomy, College of Medicine, King Saud University, Al-Kharj Campus serves as the first step in the journey for becoming efficient physicians. The department is equipped with all the necessary technologies to impart knowledge of anatomy to the medical students and conducting research.

## **Vision & Mission**

The mission of department of Anatomy is to help each student achieve his or her personal academic potential by creating an environment of education and research.

## **Chairman Message**

Welcome to the department of Anatomy at College of Medicine, King Saud University, Al-Kharj Campus. Members of our department contribute through cutting edge technology, the knowledge of human anatomy, embryology and radiographic anatomy to the medical undergraduates. The department of anatomy is committed to making a significant contribution to science and education. We invite everyone to have the glimpse of our educational and research activities through our website.

## **Faculty**

The department has a Chairman, helping him a group of distinguished staff and demonstrators.

### **Department**

Physiology

### **About us**

You have landed on the Department of Physiology of the College of Medicine, King Saud University, Al-Kharj Campus.

Physiology is an integrated science, bringing together diverse disciplines in an effort to understand the functioning of living organisms. It seeks to identify the mechanisms by which an organism maintains the processes we regard as characteristics of life. Physiological investigations of these mechanisms range from the molecular level to studies of intact animals and human subjects. More and more departments of physiology are using the latest tools of cellular and molecular biology to study these problems.

### **Vision & Mission and Chairman Message**

Prof. Subrata Nag, M.D., Ph.D.

We are basic biomedical scientists and doctors who seek to discover how biological organisms work: from the molecule to the cell to the organ to the physiology of the being. We also strive to educate the next generation of clinicians and researchers in the various disciplines of physiological sciences. In addition to our research efforts, we are committed to educating the next generation of doctors, dentists, teachers and scientists in the physiology of the human body.

Thanks for visiting and if you have any further questions, feel free to contact us.

### **Faculty**

### **Courses**

The research mission of the department of physiology is to explore how the complex cellular phenotypes that underline the integrated functions of the tissues and organ systems comprising higher organisms and emerge from the genomic code. Our research programs extend from computational methods to developmental genetics and post genomic strategies from bacteria and yeast to zebra fish, mouse and man.

## **Research**

Physiology is the study of structure, function and integration of the human body. In the pioneering days, research efforts were primarily directed at tissues and organs. This research continues to this day and has resulted in the comprehensive picture of the human body. As molecular and genetic methods have come of ages, physiologists have implemented these techniques to elucidate the molecular mechanisms that underlie physiological function. It is now clear that in order to develop a complete understanding of the normal and dysfunctional human body, we must ask questions at all levels, from the molecular to the cellular, to the organ, to the whole organism. Nowhere is it more true than department of Physiology at KSU, Al-kharj College of Medicine.

## **Conferences**

- Neurophysiology Conference
- Conference on Sports Physiology
- Conference on Metabolic Syndrome: Role of Nitrite in Physiology
- Conference on Psychophysiology of Panic Attacks
- Conference on Cardio-Respiratory Physiology

## **Department**

Molecular Biology

## **About us**

At King Saud University, College of Medicine, Al-Kharj Campus, the Department of Biochemistry and Molecular Biology is distinguished in teaching Biochemistry including Molecular Biology approaches. Our mission is to promote excellence in teaching, research and scholarship in Biochemistry and Molecular Biology. The Department will provide opportunities for students seeking to learn more physical and quantitative approaches to solving fundamental biomedical problems. In addition to medical teaching, Department will also provide diagnostic support to Hospital based departments.

## **Vision & Mission**

The mission of the Department of Biochemistry and Molecular Biology is to promote outstanding fundamental knowledge and research on mechanisms of disease at atomic and molecular levels of resolution.

## **Chairman Message**

Dr. Saad A. Hassan, M.D., Ph.D.

Welcome to the Department of Biochemistry and Molecular Biology at King Saud University, College of Medicine, Al-Kharj Campus. At our department, we study how bio molecules operate and interact to drive the complex and the diverse behaviours of living system. Our department is distinguished by its intellectual rigour and collaboration style. To learn more about us, we invite you to explore our website, contact us or visit us at Al-Kharj Campus.

**Department**

Pathology

## **About us**

The department of Pathology at College of Medicine, King Saud University, Al-Kharj Campus serves as a well known bridge between the basic sciences departments and the clinical departments. Imparting basic knowledge in the discipline of pathology helps the students to comprehend the management of diseases very well in the future.

## **Vision & Mission**

The mission of the department of pathology is to increase the knowledge and understanding of disease process mechanism.

## **Chairman Message**

I invite you all to use the webpage of department of pathology, College of Medicine, King Saud University, Al-Kharj Campus to know the educational programs, faculty and research efforts as we remain dedicated in our pursuit. Due to the translational nature of the science, the study of pathology allows us to bridge the gap between research and clinical application. Our faculty always strives to keep our students abreast with latest scientific knowledge in pathology.

## **Department**

Medical Microbiology

## **About us**

The Department of Medical Microbiology at College of Medicine , King Saud University ,Al Kharj campus is one of the six Basic sciences departments .The department is dedicated to education of medical students , at the same time rendering clinical services in the field of Infectious diseases . The Department of Medical Microbiology is comprised of an integrated team of investigators, educators and practitioners providing leading edge education, innovative research and expertise in medical microbiology and infectious diseases. The Department has a state of the arts medical equipments for the identification and susceptibility testing of pathogenic microorganisms to help in providing timely and accessible information on current and emerging issues in infectious diseases.

## **Vision & Mission**

The mission of the Department of Microbiology is to achieve and maintain pre-eminence in the discipline of Microbiology through excellence in teaching and research.

## **Chairman Message**

Dr. Saad A. Hassan, M.D., Ph.D.

Welcome to the department of Medical Microbiology at the King Saud University, College of Medicine, Al-Kharj Campus. Through our excellence in practice, research and education, we attract learners, educators, researchers and industry to develop the next generation of global leaders in infectious diseases. At Our department we are committed to discovering and disseminating knowledge about the microbial world .Our website contains information about the departmental faculty .We impart education to medical students in the areas of contemporary microbiology, ranging from the structure, physiology and development of micro-organism to molecular pathogens of infections .We also collaborate with clinical departments providing the feedback .

## **Department**

Internal Medicine

## **About us**

The department of Internal Medicine is actively engaged in the care of the patients from local community. We provide primary care to many patients living in the area, the full range of sub-speciality care to local and regional patients, and state of the art innovations in many areas in medicine. This care is delivered in conjunction with clinical research programs and the clinical education of medical students that strives the highest levels of patient satisfaction and professionalism.

## **Vision & Mission**

Advancing medicine for the health of the citizens of Al-kharj, Riyadh and beyond through quality patient care, innovative research and training the next generation of physicians and other healthcare providers. The department of Internal Medicine is a collaborative community. It will access the achievement and talent of its members to explore new ideas, enhance professional development and interact with community at large.

## **Chairman Message**

Members of the department are involved in healthcare professionals at all levels (undergraduate school of medicine and public health, continuing medical education and allied health professional education). This actively includes efforts to develop and maintain a curriculum that is appropriate for the education of healthcare providers in the next century, and to enhance the effectiveness of the educational process through innovation. Our education programs enjoy an excellent reputation and have been recognized by School of Medicine, University of Texas.

## **Faculty**

## **Courses**

Program Highlights:

Three year categorical program.

One year preliminary medicine training program.

Opportunity to learn advanced medicine from distinguished Medical College Faculty. Comprehensive curriculum encompassing all internal medicine topics in a systematic manner.

Evidence based medicine approved / seminars.

Competitive fellowship placement in numerous fields and specialities.

Various basic and clinical research opportunities.

Sub-speciality rotation in different specialist hospitals.

Board preparation with on-site courses available.

Non-teaching service for community physicians.

Dedicated teaching program for residency supervision and teaching.

## **Research**

### **Conferences**

1. Diabetes Mellitus and its complications: Molecular mechanism, epidemiology and clinical medicine.

April 2009, Riyadh

2. Granulocyte colony stimulating factors to reduce the incidence of chemotherapy – induced febrile neutropenia in adult patients with lymphomas and solid tumours.

July 2009, Jeddah

3. Under treatment and under diagnosis of hypertension – A serious problem in the Kingdom of Saudi Arabia.

October 2009, Riyadh

4. Audit of a Diabetes Clinic at Al-Kharj Campus,

October 2009, Al-Kharj

5. Peanut Allergy: An overview of allergy and asthma

November 2009, Riyadh

## **Department**

Otorhinolaryngology

### **About us**

The department of Otorhinolaryngology-Head and Neck surgery, commonly referred as ENT at College of Medicine, King Saud University, Al-Kharj Campus, is dedicated to the treatment of the patients with diseases of Ears, Nose and Throat, along with providing best suited teaching to the undergraduate medical students.

### **Vision & Mission**

The department of Otorhinolaryngology, College of Medicine, King Saud University, Al-Kharj Campus, is committed to provide outstanding care for patients with ENT diseases and also render knowledge to make the medical graduate front runner in research and healthcare.

### **Chairman Message**

Welcome to the Department of Otolaryngology

Our department is committed to enhancing the health of people through education, biomedical research, and clinical programs

Our educational program at College of Medicine, King Saud University, Al-Kharj Campus, is structured to training outstanding medical graduates with knowledge of Otorhinolaryngology .We as a department shall t take great pride in accomplishments of our students – watching them grow from student to highly skilled practitioners. We are committed to insuring that our students recognize and respect the importance of humanism in the age of technology and care for patients while treating them.

### **Faculty**

### **Courses**

### **Research**

The Department of Otolaryngology has extensive research opportunities.

## **Department**

Ophthalmology

## **About us**

Welcome to our home page of Department of Ophthalmology, College of Medicine, King Saud University, Al-Kharj Campus. The department has assumed responsibilities in teaching, research and patient care. The department is equipped with state of the art infrastructure and cutting edge technology. A carefully selected and internationally qualified faculty speaks of our commitment to our students to train them to be the future leaders in their field. The department has the responsibility to find new modalities of eye care through research and innovation to prevent blindness.

## **Vision & Mission**

**VISION:** To TAKE VISUAL SCIENCE TO THE NEXT LEVEL AND BE A CENTRE OF EXCELLENCE IN EYE CARE

**MISSION:** Our mission is to train future leaders in Ophthalmology and state of art patient care, clinical and basic science research.

## **Chairman Message**

We thank you for visiting the department of Ophthalmology, College of Medicine, King Saud University, Al-Kharj Campus. The department has a carefully and internationally qualified faculty and has a state of the art infrastructure for carrying out clinical research to advance the understanding and treatment of ocular disorders. We strive to be a centre of excellence for eye care in the Kingdom. The faculty is keen to instil basic scientific knowledge in ophthalmology to its students and encourage the medical students to pursue careers in Ophthalmology whether as researchers or clinicians. We offer a diverse patient population and extensive surgical experience with faculty supervision in all clinics.

## **Faculty**

### **Courses**

The course deals with various congenital, infective, inflammatory, neoplastic and nutritional deficiencies of eye disorders and management. Students are taught diagnosis and treatment of refractory errors of the eye. The course enables students to get hands-on experience in examining the eye and the use of various diagnostic tools. Principles and steps of the commonly carried out ophthalmological surgeries are elaborated. The course covers ocular manifestations of systemic diseases and various emergencies like foreign body and trauma.

Recommended Books:

- 1) Parson's Diseases of the Eye by Miller, S.J. Churchill Livingstone.
- 2) Optics of Human Eye by Atchison, D.A. and Smith, G. Blackwell.

## **Research**

The discipline of Ophthalmology is committed to a leading centre of research in many aspects of vision science.

## **Conferences**

1. Bahrain to host 10th International Congress of MEACO

Biennial congress will run from March 26-30, 2009 at the Bahrain International Exhibition and Conference Centre.

2. 7th International Conference on Nanochannels, Microchannels and Minichannels - REGISTER NOW!

Pohang, South Korea - June 22-24, 2009

Focus on MEMS, microfluidic, bio-medical and many other frontier research disciplines

3. 4th Frontiers in Biomedical Devices –

REGISTER NOW!

Irvine, CA - June 8-9, 2009

Covering state-of-the-art cardiovascular, orthopedic, Ophthalmology/dermatology and testing issues

Pediatrics

## **About us**

The department of Pediatrics is one of the six clinical departments. The department of Pediatrics is committed to excellence in clinical care, research, education. Pediatrics is taught in two courses. The department of pediatrics supervises the following courses: Primary Health Care, Family Medicine, Clinical Nutrition and Medical Research and Evidence Based Medicine. The faculty in the department is also responsible for providing clinical services in the University hospital.

## **Vision & Mission**

To provide teaching of medical students and skilled health care of highest quality in the field of paediatric and to encourage infusion of scientific thinking in learning and research endeavours in clinical practice.

## **Chairman Message**

Welcome to the website of the department of Pediatrics, College of Medicine, King Saud University, Al-Kharj Campus, our faculty is committed to provide our students the knowledge, skills, attitude to enable them to provide care to children in safe way. The department is also committed to be front runner in the field of healthcare and research.

## **Department**

Obstetrics and Gynecology

## **About us**

The department of Gynecology and Obstetrics is one of the twelve departments which make up the College of Medicine, King Saud University Al-Kharj Campus. The Department has the responsibility of teaching Obstetrics and Gynecology to undergraduate medical students. The faculty in the department are also responsible for providing clinical services in the hospital associated with College of Medicine. We provide excellent treatment and care for patient with normal and high risk pregnancies, and we expertly address a wide range of gynaecologic and women health concerns.

“Come and Explore the Al-Kharj Difference”

## **Vision & Mission**

The mission of department of Obstetrics and Gynecology, College of Medicine, King Saud University, Al-Kharj Campus is to provide the community with medical resources in the form of scientific knowledge and trained personnel, so as to improve the overall health of the community.

## Chairman Message

Welcome to the website of the department of Obstetrics and Gynecology, College of Medicine, King Saud University, Al-Kharj Campus. Here you will find information of our educational program, faculty, and about clinical and research activities. As a teaching university department we have commitments to medical students and resident physician education. The department has strong combination of clinical practice and basic sciences to inform its research, teaching and clinical practice. We are committed to uphold and enhancing the standards of medical education and offer physicians taking care of reproductive health and other related issues of women. We combine our compassion, our experience and our resources to provide great care, excellent medical education and ground breaking research.

## Faculty

## Courses

### Obstetrics/Gynecology I

During this course, students are trained on history-taking and clinical-examination skills, pertinent to gynecology and obstetrics. Antenatal and perinatal care, normal labor and associated complications are also covered. Postpartum care and complications related to the puerperium are studied. Congenital anomalies and traumatic afflictions of female genital tract and uterine prolapsed are also elaborated upon. Reproductive health including contraception, family planning, genital infections, and counselling of infertility are dealt with.

### Obstetrics/Gynecology II/

This course deals with abnormal presentations, ectopic and multiple pregnancies. It covers etiology and management of dysfunctional uterine bleeding, operative gynecology including endoscopy, benign and malignant tumours of female genital tract and their management in accordance with modern principles. In addition, the course enhances the clinical skills acquired by students in the preceding gynecology and obstetrics module. The course includes problem-based learning as a teaching method.

### Undergraduate Education

- [Program Objectives](#)
- [Organization of the Rotation](#)
- [Essential Learning Objectives in Women's Health](#)

- Skills
- Evaluations

## Program Objectives

The objectives in Obstetrics and Gynecology incorporate both the general objectives of the MBBS Programme and Clinical exposure. These should be reviewed prior to each rotation.

The obstetrical and gynecological evaluation is an integral part of the general medical history and physical examination. The sensitive and highly personal nature of this evaluation requires honing of communication skills as well as acquisition of new physical examination skills. An awareness of one's attitude towards women, their unique health problems and issues will assist in patient's care.

## Organization of the Rotation

This dynamic rotation consists of time spent in Labor and Delivery, Emergency and Selective. In addition, students will participate in a community placement with an obstetrician gynecologist.

## Essential Learning Objectives in Women's Health

- History
- Physical Exam
- Diagnosis and Management Plan
- Pharmacology
- Environmental Exposures
- Immunizations
- Contraception, Sterilization and Abortion
- Papanicolaou Smear and Culture
- Sexually Transmitted Diseases
- Sexuality
- Domestic Violence and Sexual Assault
- Menstrual Cycle and Its Abnormalities
- Premenstrual Syndrome
- Menopause
- Adolescence
- Urinary Incontinence
- Vulvar and Vaginal Diseases
- Pelvic Pain
- Gynecologic Malignancies
- Spontaneous Abortion and Ectopic Pregnancy
- Maternal-Fetal Physiology
- Postpartum Care

## Skills

Opportunities for developing skills in assessing women's health care, including history and physical examination in the pregnant and non-pregnant patients, will be available. There are scheduled sessions to learn pelvic examinations.

All clerks will have a community-based preceptor. Exposure to typical problems encountered in general obstetric and gynecologic practice will enhance history taking and physical examination skills. The opportunity to experience more complicated medical and surgical problems encountered in specialized tertiary care clinics are also available.

## Evaluations

Evaluation is consistent with the general policies of the MBBS Programme.

## Recommended Books:

- 1) Hacker Moore's Essentials of Obstetrics and Gynecology by Hacker, N.F., Gambone, J.C. and Hobel, C.J. Saunders.
- 2) Gynecology by Ten Teachers by Monga, A. and Baker, P. Oxford University Press.
- 3) Obstetrics by Ten Teachers by Monga, A. and Baker, P. Oxford University Press.
- 4) Llewellyn-Jones Fundamentals of Obstetrics and Gynaecology by Oates, J.K. and Abraham, S. Mosby.
- 5) Problem-Based Learning: An Approach to Medical Education by Burrows, H.S. and Tamblin, R.M. Springer Series on Medical Education.

## Research

The Discipline of Obstetrics and Gynecology is a leading centre for research in many aspects of reproduction. It has an international reputation in the areas of maternal-fetal physiology, circadian physiology, reproductive immunology, embryology, advanced reproductive technology and perinatology
