Report No. []

Title:

Write the title of the experiment provided by your instructor.

Aim/Objective:

Write the reason or the goal you have done the following experiments.

Materials:

Write a list of all the chemicals, media, equipments, and tools that you used inside the laboratory.

Methods:

- 1- Determine whether you should apply aseptic techniques.
- 2- Write as list of steps
- 3- Determine the sterilization techniques of each tool
- 4- Don't forget labelling
- 5- Determine the Temperature and duration of incubation.

Results:

- 1- Write it in the form of table
- 2- Add pictures or drawing with caption and labels of the results.

Discussion:

Explain each one of your results from the information that you have studied or ask your instructor for help.
