

03 November 2016

TO WHOM IT MAY CONCERN:

It is my pleasure to write this letter of recommendation for Dr. Mohammed Yasser Al Helou whom I have known for the past 20 years as a general practitioner at King Abdulaziz University Hospital (KAUH) Outpatient Internal Medicine clinics.

Dr. Al Helou has a pleasant and friendly personality which enables him to communicate well with his colleagues as well as with his patients. He is a hardworking physician who is executing his work professionally to the best of his ability. His main interest is to take care of diabetic patients and how to improve their lifestyle to cope with the disease. He is always ready to develop himself and keep up-to-date through attending conferences, workshops and lectures.

He was involved in some activities at KAUH and in the College of Medicine. These activities include being the chairman for health support and education committee and serving as the coordinator for scientific events of Ambulatory Care Services (ACS) and Department of Emergency Medicine (DEM). In addition, he was involved in developing Quality Indicators Performance (QIP) and in formulating and monitoring indicators to achieve Canadian Accreditation in 2011.

He is a member of various associations such as Riyadh Diabetes Club, Saudi Osteoporosis Society, Saudi Thoracic Society, Saudi Society of Emergency Physicians and Saudi Society of Endocrine Metabolism.

I highly do support Dr. Al Helou for any position he is seeking, without any reservation.
