

## 373 Math Exercises

**Required text book:**

**Introduction to Topology by Crump W. Baker**

### Chapter 2 :

**From Text book:**

2.1: 1, 4, 5, 6, 7.

2.2: 1,2, 4, 5, 6, 7, 8, 9

**Additional Problems:**

1. List all topologies for a set containing three distinct elements.
2. Prove that for a non empty set  $X$ , the collection  $\tau = \{X, \Phi\} \cup \{U: X - U \text{ is countable}\}$  is a topology on  $X$ , this topology is called co-countable topology.
3. Is there a set in which discrete and indiscrete topologies coincide on it?
4. Give an example of a nontrivial topology on an infinite set  $X$  which has only a finite number of elements.
5. If  $\tau_1$  and  $\tau_2$  are two topologies on  $X$ , is  $\tau_1 \cap \tau_2$  a topology on  $X$ ? Is  $\tau_1 \cup \tau_2$  a topology on  $X$ ?
6. Prove that  $\tau$  is the discrete topology on  $X$  iff every point in  $X$  is an open set.
7. Let  $X = \mathbb{N}$ . For each  $n \in \mathbb{N}$  define  $U_n = \{n, n + 1, n + 2, \dots\}$ . Let  $\tau = \{X, \phi\} \cup \{U_n: n \in \mathbb{N}\}$ . Prove that  $\tau$  is a topology on  $X$ .

**From Text book:**

2.3:1, 2, 3, 4, 5, 6, 7, 8, 9, 13.

2.4: 1, 2, 3, 4, 5, 6, 7, 10, 13, 14, 15, 16, 17,

**Additional Problems:**

1. In  $(\mathbb{R}, \mathcal{U})$ , do rationals form an open set? Closed set? Neither? Both? Justify your answer.
2. Consider  $A = \{x: 0 < x < 2\} \cup \{10\}$ . Find  $\text{Cl}(A)$  in  $(\mathbb{R}, \mathcal{U})$ .
3. Give an example of a collection of open sets whose intersection is not open.
4. Give an example of two sets  $A$  and  $B$  of  $\text{In } (\mathbb{R}, \mathcal{U})$  such that  $A$  and  $A \setminus B$  are both open but  $B$  is not closed.
5. Give an example of a countable set in  $\text{In } (\mathbb{R}, \mathcal{U})$  that is not closed.
6. Give an example of a countable set in  $\text{In } (\mathbb{R}, \mathcal{U})$  that is closed.
7. Prove that  $A$  is open iff  $A \cap \text{Bd}(A) = \emptyset$
8. Prove that  $A$  is closed iff  $\text{Bd}(A) \subseteq A$ .
9. Prove that  $\text{Bd}(A) = \emptyset$  iff  $A$  is both open and closed.

**From Text book:**

2.5:1,2,3,4,5,9,10.

**Additional Problems:**

1. Find a base for the open half-line topology which is different from the topology itself.

2. Let  $(X, \tau)$  be a topological space and  $\mathcal{B}$  a base for  $\tau$ . Prove that  $A \subseteq X$  is dense in  $X$  iff each nonempty element of  $\mathcal{B}$  contains a point of  $A$ .

**Definition:**

Two collections  $\mathcal{B}_1$  and  $\mathcal{B}_2$  of subsets of  $X$  are equivalent bases iff there exists a topology  $\tau$  for  $X$  such that  $\mathcal{B}_1$  and  $\mathcal{B}_2$  are both bases for  $\tau$ .

3. Let  $(X, \tau)$  be a topological space,  $\mathcal{B}_1$  a base for  $\tau$ , and  $\mathcal{B}_2$  a collection of subsets of  $X$ . Prove that  $\mathcal{B}_1$  and  $\mathcal{B}_2$  are equivalent bases iff

- a. For each  $U_1 \in \mathcal{B}_1$  and  $x \in U_1$ , there is a  $U_2 \in \mathcal{B}_2$  such that  $x \in U_2 \subseteq U_1$  and
- b. For each  $U_2 \in \mathcal{B}_2$  and  $x \in U_2$ , there is a  $U_1 \in \mathcal{B}_1$  such that  $x \in U_1 \subseteq U_2$ .

## Chapter 3:

### From Text book:

3.1: 1,2,3,4,5,6,8,9,13,15,16.

3.2: 1,3,4,6,8,9,10,12,13,14,18.

### Additional Problems:

Q1: Let  $f: \mathbb{R} \rightarrow \mathbb{R}$  be given by  $f(x) = \begin{cases} 1 & x \geq 0 \\ -1 & x < 0 \end{cases}$

Determine whether  $f$  is

- a)  $\tau_{cof} - \mathcal{U}$  continuous.
- b)  $\mathcal{U} - \tau_{cof}$  continuous.
- c)  $\mathfrak{F}_1 - \mathcal{U}$  continuous.
- d)  $\mathcal{U} - \mathfrak{F}_1$  continuous.
- e)  $\mathcal{C} - \mathcal{C}$  continuous.

Q2: Repeat the previous question for the function  $g(x) = x + 1$

### From Text book:

3.3: 1,2,3,4,7,8,11,13,14,15,20,21,22.

### Additional Problems:

Q2: Let  $f: (X, \mathfrak{F}) \rightarrow (Y, \mathcal{S})$  be a homeomorphism,  $A \subseteq X$ . Prove the following:

- a) If  $a \in \text{int}(A)$ , then  $f(a) \in \text{int}(f(A))$ .
- b) If  $a \in \text{Bd}(A)$ , then  $f(a) \in \text{Bd}(f(A))$ .

## Chapter 4:

### From Text book:

4.1: 1,2,3,4,5,6,8,11.

Review Exc.: 3,5

### Additional Problems:

Q1: Determine whether the set  $W = \{(x, y) : x > 0, |y| \geq 5\}$  is open in :

- (a)  $(\mathbb{R}, \mathcal{U}) \times (\mathbb{R}, \mathcal{H})$
- (b)  $(\mathbb{R}, \mathcal{H}) \times (\mathbb{R}, \mathcal{U})$
- (c)  $(\mathbb{R}, \mathcal{C}) \times (\mathbb{R}, \mathcal{C})$

## Chapter 6 :

### From Text book:

6.1: 1,2,3,4,5,6,7,8,11,12,13,14,15 ,18,19,20

6.2: 1,2,3,4,5,6,7

### Additional Problems:

Q1. Let  $X$  be any infinite set with two topologies  $\tau_1$  and  $\tau_2$  such that  $(X, \tau_2)$  is a compact space, and  $\tau_1 \subset \tau_2$ . Show that  $(X, \tau_1)$  is compact.

Q2. Let  $X = \mathbb{R}$ ,  $\tau = \{U \subseteq \mathbb{R}; U = \mathbb{R} \text{ or } U = \emptyset, \text{ or } U = (a, \infty), a \geq 0\}$  Is  $(\mathbb{R}, \tau)$  a compact space.

Q3. Give an example of a compact space which has a non compact subspace.

Q4. Prove that if  $(X, \tau)$  is a Hausdorff space then so is every subspace of  $X$ .

Q5. Show that Theorem 6.1.21 is not true if  $X$  is not compact.

## Chapter 8:

### From Text book:

8.1: 1, 3, 5, 6, 7, 10, 11.

8.2: 5, 9, 10, 11, 12.

8.3: 2, 3, 4, 5, 8, 9, 14, 15, 16.

8.4: 2(b, c, e, h), 4, 5, 6, 8.

### Additional Problems:

**Definition:** Let  $A \neq \emptyset$ ,  $B \neq \emptyset$  be two subset of the metric space  $(X, d)$ . Then the distance between  $A$  and  $B$  is given by  $d(A, B) = \inf\{d(x, y) : x \in A, y \in B\}$ .

If  $A = a$ , we write  $d(a, B)$  for  $d(A, B)$ .

Q1. Let  $(X, d)$  be a metric space and  $A$  a nonempty subset of  $X$ . If  $x, y \in X$ , prove that  $d(x, A) \leq d(x, y) + d(y, A)$ .

Q2. Give an example to show that for an open ball  $B_r(y)$  in a metric space  $(X, d)$ , it is not true that  $Bd(B_r(y)) = \{x \in X : d(x, y) = r\}$

Q3. Let  $(X, d)$  be a metric space and define  $e(x, y) = d(x, y)/(1 + d(x, y))$  Prove that  $e$  is a bounded metric for  $X$ .
