Fall – 2022 (1<sup>st</sup> Sem. 1444H)

**Chapter 3**

***Data Modeling and Design – p3 – Case Study***

Prepared by: Ahmed M. El-Sherbeeny, PhD

# Lesson Overview

- Introduction – (p1)
- E-R Diagram – (p2)
- **Case Study – (p3)**

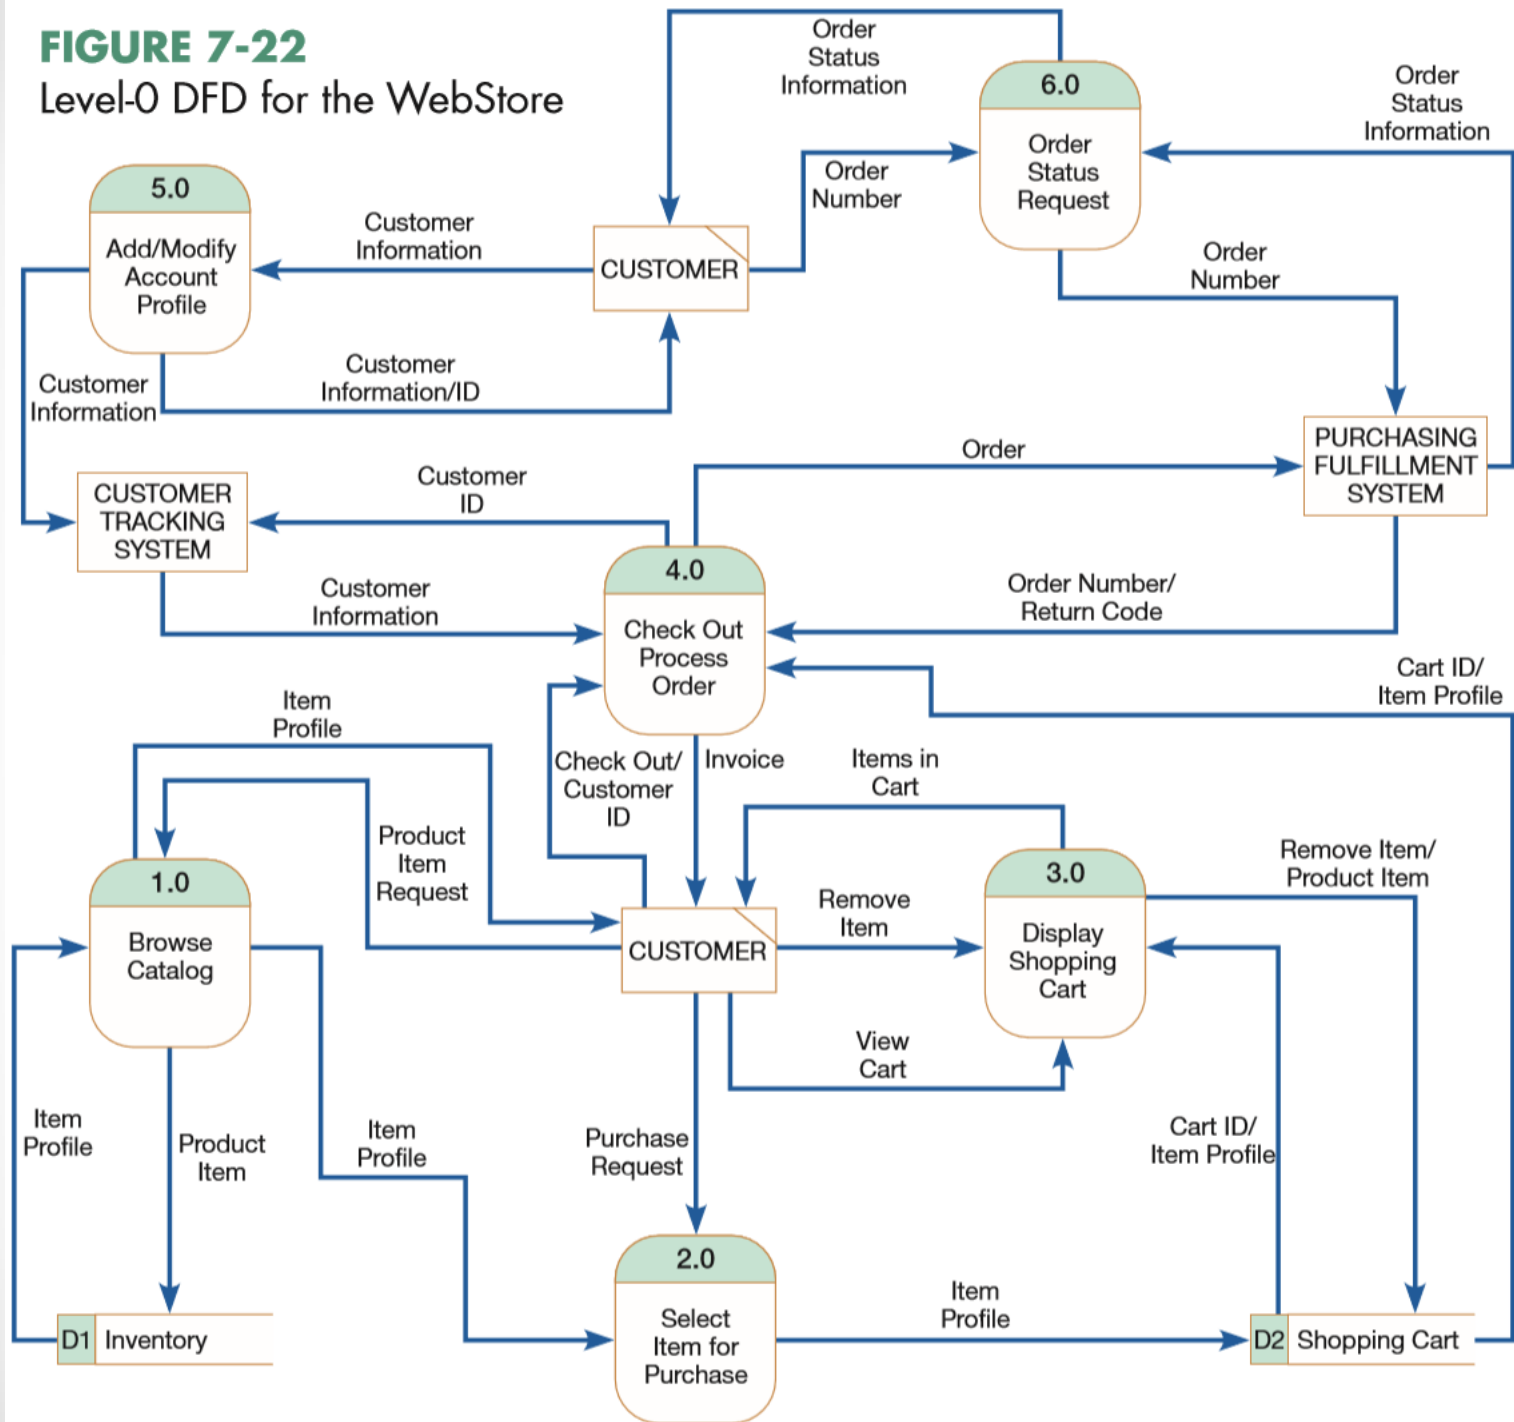

**Case Study –  
Electronic Commerce Application –  
Conceptual Data Modeling for  
“Pine Valley Furniture” WebStore**

# E-R Diagram: PVF Furniture Webstore

## Background:

- Remember, senior systems analyst (Jim Woo):
  - First, completed JAD (Joint Application Design) session
  - Then created [DFD](#) for webstore system
- He was then asked to develop a conceptual data model for the WebStore

**FIGURE 7-22**  
Level-0 DFD for the WebStore

# E-R Diagram: PVF Furniture Webstore

## Conceptual Data Modeling Plan:

- He developed conceptual data model for WebStore using following steps:
  1. Identify general categories of information using:
    - Information from JAD session
    - Additional information from DFD (data stores, data flows)
  2. Carefully examine each data category using the DFD:
    - Determine unique data flows within each data category
    - Record source and destination of all data flows
  3. Construct E-R diagram for WebStore:
    - Determine system unique entities
    - Identify interrelationships among entities
    - Draw E-R diagram (with entities)

# E-R Diagram: PVF Furniture Webstore

## 1. Identify general categories of information:

- Information from [JAD session](#)
  - [Table 8-2](#) shows a summary of *customer* and *inventory* information identified during the JAD session
  - Identify information the WebStore needed to capture, store, and process
- Additional info from [DFD](#) (data stores, data flows)
  - data stores (strong candidates to become entities in ERD):
    - Inventory (D1)
    - Shopping Cart (D2)
  - examine data flows from DFD for other possible *sources* for entities:
    - Order
    - Temporary User/System Messages

# E-R Diagram: PVF Furniture Webstore

**TABLE 8-2** Customer and Inventory Information for the WebStore

Home Office Customer	Student Customer	Inventory Information
Name	Name	SKU
Doing Business as (company's name)	School	Name
Address	Address	Description
Phone	Phone	Finished Product Size
Fax	E-Mail	Finished Product Weight
E-Mail		Available Materials
		Available Colors
		Price
		Lead Time

# E-R Diagram: PVF Furniture Webstore

## 1. Identify general categories of info. (cont.):

- Analysis resulted in the identification of 5 general categories of information:
  - Customer
  - Inventory
  - Order
  - Shopping Cart
  - Temporary User/System Messages

# E-R Diagram: PVF Furniture Webstore

## 2. Examine each category using the DFD:

- List for each data category (Table 8-3):
  - each of its data flows, and
  - corresponding description
- List for each data category (Table 8-4):
  - source and destinations for each *unique* data flow
- Purpose of these two tables:
  - document WebStore's requirements
  - what information was needed to move from point to point

**TABLE 8-3 Data Category, Data Flow, and Data Flow Descriptions for the WebStore**

<b>Data Category/Data Flow</b>	<b>Description</b>
<b>Customer-Related</b>	
Customer ID	Unique identifier for each customer (generated by Customer Tracking System)
Customer Information	Detailed customer information (stored in Customer Tracking System)
<b>Inventory-Related</b>	
Product Item	Unique identifier for each product item (stored in Inventory Database)
Item Profile	Detailed product information (stored in Inventory Database)
<b>Order-Related</b>	
Order Number	Unique identifier for an order (generated by Purchasing Fulfillment System)
Order	Detailed order information (stored in Purchasing Fulfillment System)
Return Code	Unique code for processing customer returns (generated by/stored in Purchasing Fulfillment System)
Invoice	Detailed order summary statement (generated from order information stored in Purchasing Fulfillment System)
Order Status Information	Detailed summary information on order status (stored/generated by)
<b>Shopping Cart</b>	
Cart ID	Unique identifier for shopping cart
<b>Temporary User/System Messages</b>	
Product Item Request	Request to view information on a catalog item
Purchase Request	Request to move an item into the shopping cart
View Cart	Request to view the contents of the shopping cart
Items in Cart	Summary report of all shopping cart items
Remove Item	Request to remove item from shopping cart
Check Out	Request to check out and process order

**TABLE 8-4 Data Category, Data Flow, and the Source/Destination of Data Flows within the WebStore DFD**

Data Flow	From/To
<b>Customer-Related</b>	
Customer ID	From Customer to Process 4.0 From Process 4.0 to Customer Tracking System
Customer Information	From Process 5.0 to Customer From Customer to Process 5.0 From Process 5.0 to Customer From Process 5.0 to Customer Tracking System From Customer Tracking System to Process 4.0
<b>Inventory-Related</b>	
Product Item	From Process 1.0 to Data Store D1 From Process 3.0 to Data Store D2
Item Profile	From Data Store D1 to Process 1.0 From Process 1.0 to Customer From Process 1.0 to Process 2.0 From Process 2.0 to Data Store D2 From Data Store D2 to Process 3.0 From Data Store D2 to Process 4.0
<b>Order-Related</b>	
Order Number	From Purchasing Fulfillment System to Process 4.0 From Customer to Process 6.0 From Process 6.0 to Purchasing Fulfillment System
Order	From Process 4.0 to Purchasing Fulfillment System
Return Code	From Purchasing Fulfillment System to Process 4.0
Invoice	From Process 4.0 to Customer
Order Status	From Process 6.0 to Customer From Purchasing Fulfillment System to Process 6.0
<b>Shopping Cart</b>	
Cart ID	From Data Store D2 to Process 3.0 From Data Store D2 to Process 4.0
<b>Temporary User/System Messages</b>	
Product Item Request	From Customer to Process 1.0
Purchase Request	From Customer to Process 2.0
View Cart	From Customer to Process 3.0
Items in Cart	From Process 3.0 to Customer
Remove Item	From Customer to Process 3.0
Check Out	From Process 3.0 to Data Store D2 From Customer to Process 4.0

# E-R Diagram: PVF Furniture Webstore

## 3. Construct E-R diagram for WebStore:

- Jim decided that unique entities for E-R diagram:
  - Customer
  - Inventory
  - Order
- Note, all 3 meet entity criteria: person, event, or object (*which is which?*)

# E-R Diagram: PVF Furniture Webstore

## 3. Construct E-R diagram for WebStore (cont.):

- Remaining two categories:
  - Temporary User/System Messages:
    - not permanently stored items
    - not person/event/object
    - $\Rightarrow$  *should not* be an entity in model

# E-R Diagram: PVF Furniture Webstore

## 3. Construct E-R diagram for WebStore (cont.):

- Remaining two categories (cont.):
  - Shopping Cart:
    - temporarily stored item (for at least duration of a customer's visit to the WebStore), and
    - can be considered an object
    - [Process 4.0](#) (Check Out Process Order) moves *Shopping Cart* contents to the *Purchasing Fulfillment System*, where order details are stored
    - $\Rightarrow$  *should* be an entity in model

# E-R Diagram: PVF Furniture Webstore

3. **Construct E-R diagram for WebStore (cont.):**
  - Summary of required [entities](#) for E-R diagram:
    - Customer
    - Inventory
    - Order
    - Shopping Cart

# E-R Diagram: PVF Furniture Webstore

## 3. Construct E-R diagram for WebStore (cont.):

○ Identify interrelationships among 4 [four entities](#):

### 1. CUSTOMER – SHOPPING CART relationship

- Each Customer *owns* 0 or 1 Shopping Cart instances
- Each Shopping Cart instance *is owned by* one and only one Customer

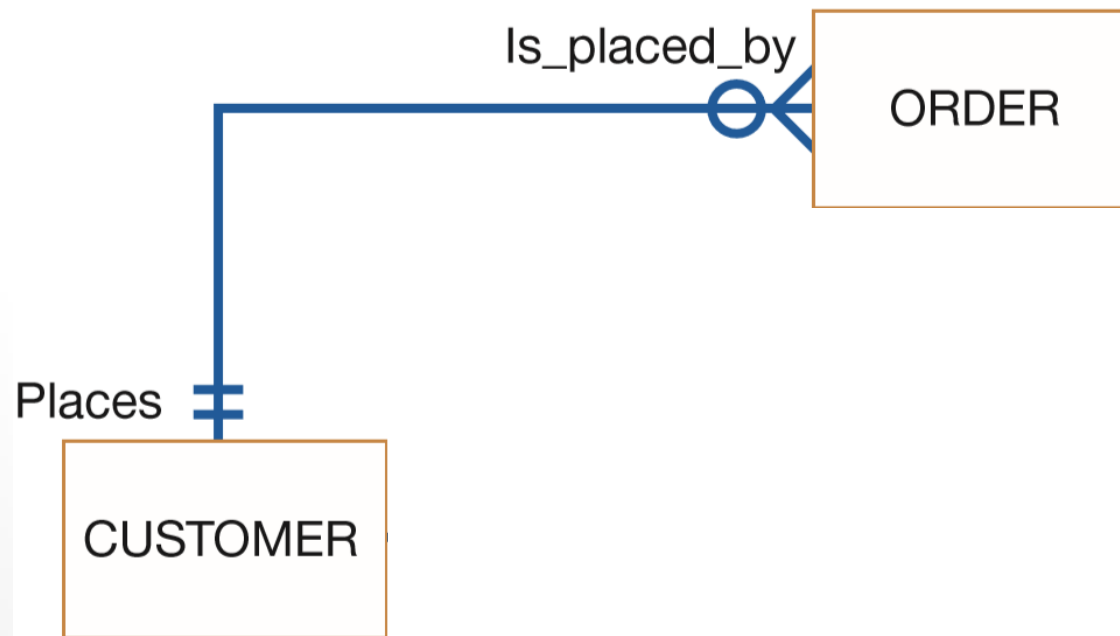

# E-R Diagram: PVF Furniture Webstore

## 3. Construct E-R diagram for WebStore (cont.):

○ Interrelationships among 4 [four entities](#) (cont.):

### 2. CUSTOMER – ORDER relationship

- Each Customer *places* zero to many Orders
- Each Order *is placed by* one and only one Customer

# E-R Diagram: PVF Furniture Webstore

## 3. Construct E-R diagram for WebStore (cont.):

○ Interrelationships among 4 [four entities](#) (cont.):

### 3. ORDER – SHOPPING CART relationship

- Each Order *contains* one to many [Shopping Cart instances](#)
- Each Shopping Cart instance *is contained in* one and only one Order

# E-R Diagram: PVF Furniture Webstore

## 3. Construct E-R diagram for WebStore (cont.):

○ Interrelationships among 4 [four entities](#) (cont.):

## 4. SHOPPING CART – INVENTORY relationship

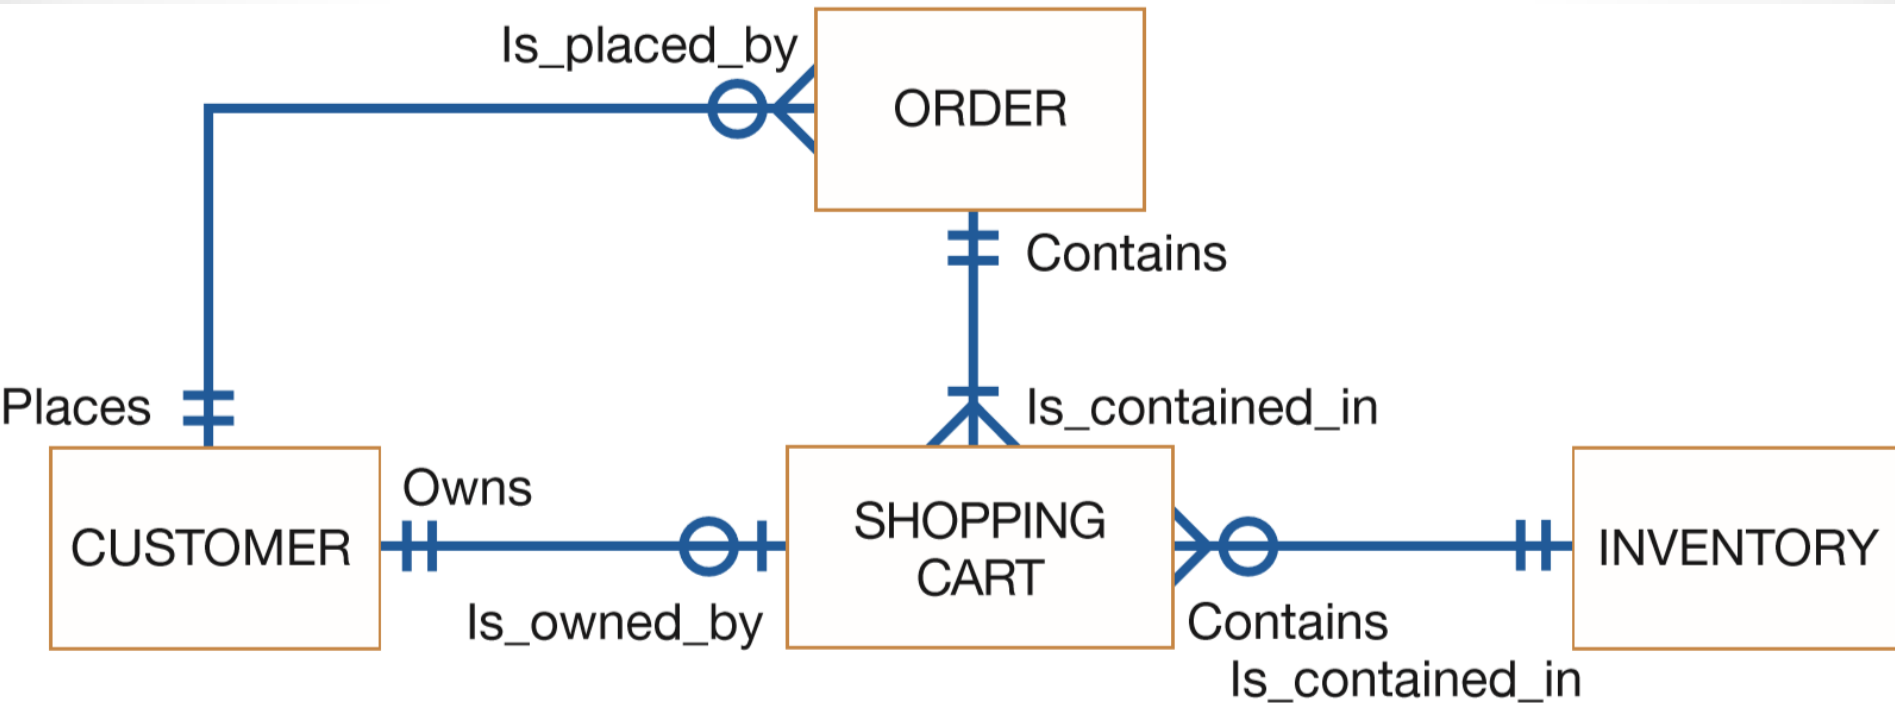

- Each Shopping Cart instance *contains* one and only one Inventory item
- Each Inventory item *is contained in* zero or many Shopping Cart instances

# E-R Diagram: PVF Furniture Webstore

## 3. Construct E-R diagram for WebStore (cont.):

- Draw E-R diagram (with [entities](#)):

**FIGURE 8-22**

E-R diagram for the WebStore system

# E-R Diagram: PVF Furniture Webstore

## 3. Construct E-R diagram for WebStore (cont.):

- Draw E-R diagram (with entities) – cont.:
  - Q: Can you now apply the [E-R diagram](#) to the [Sample Customer Form](#)?
  - Jim can then list specific [attributes](#) for each entity
  - then compare these lists with existing inventory, customer, and order database tables

# Gathering Info. for Conceptual Data Modeling

## FIGURE 8-4

Sample customer form

### PVF CUSTOMER ORDER

ORDER NO: 61384

CUSTOMER NO: 1273

NAME: Contemporary Designs  
ADDRESS: 123 Oak St.  
CITY-STATE-ZIP: Austin, TX 28384

ORDER DATE: 11/04/2014

PROMISED DATE: 11/21/2017

PRODUCT NO	DESCRIPTION	QUANTITY ORDERED	UNIT PRICE
M128	Bookcase	4	200.00
B381	Cabinet	2	150.00
R210	Table	1	500.00
