### Question 1

Write a program that prompts the user to enter the distance to drive, the fuel efficiency of the car in kilometers per liter, and the price per liter, and displays the cost of the trip.

Use class name **Fuel**

Here is a sample run:

```
Enter the driving distance: 900.5 ↵
Enter kilos per liter: 25.5 ↵
Enter price per liter: 3.55 ↵
The cost of driving is $125.36372549019607
```
