PROFESSIONAL SUMMARY

With more than 15 years' experience in pharmaceutical research and academia, I am now a Professor at King Saud University with duties including lead roles in teaching, research and accreditation. During this time, I have served for more than four years as Vice Dean of Graduate Studies and Research at the College of Pharmacy at King Saud University in addition to other administrative responsibilities.

My considerable managerial experience has been consolidated through achieving a change management certificate from Cornell University, which has led me to explore more about strategic approaches to derive organisational changes in pursuit of effective change. I worked simultaneously as a consultant in different sectors; over more than six years in King Abdulaziz City for Science and Technology (KACST), the last two years in which I acted as an advisor to the Vice President of Scientific Research, where my duties have included innovation evaluation, quality control, development of analytical services, research policies, grant policies and regulations. I have also held consultancy positions at both the Riyadh Valley Company (RVC) and the Research Products Development Innovations Company (RPDC) where my responsibilities encompassed assessing the feasibility of investment in pharmaceutical research projects and start-up companies. In addition to my academic duties, I am currently an advisor to the Vice President of Strategy and Development at the Education and Training Evaluation Commission (ETEC) contributing to the updating of the organisational strategy and have been assigned to represent the Commission on several occasions and in a variety of governmental entities. I am also a Programme Manager of the Jahziah megaproject, which aims to raise the quality of academic programme output and enhance alignment with the labour market requirements
