Report No. (5)

Determination The Molarity of CH ₃ COOH by titration with NaOH				
lent Names:	•••••		Secti	ion No:
e objective of th	e experiment:			
ction equation:				
ults and calcula	ntions:	•••••••••••••••••••••••••••••••••••••••	••••••	
	Init.Read	Final Read	Volume (ml)	Average (ml)
Run 1				
Run 2				
			• Calculate the CH ₃ COOH::	Molecular weight o
2. Calculate th	e Strength of CH3CC	OOH Solution.	• Calculate the CH ₃ COOH::	Molecular weight o C = 12, H = 1, O =1
2. Calculate th	e Strength of CH3CC	OOH Solution.	• Calculate the CH ₃ COOH::	Molecular weight o C = 12, H = 1, O =1
2. Calculate th	e Strength of CH3CC	OOH Solution.	• Calculate the CH ₃ COOH::	Molecular weight o C = 12, H = 1, O =1
2. Calculate th	e Strength of CH3CC	OOH Solution.	• Calculate the CH ₃ COOH::	Molecular weight o C = 12, H = 1, O =1
2. Calculate th	e Strength of CH3CC	OOH Solution.	• Calculate the CH ₃ COOH::	Molecular weight o C = 12, H = 1, O =1
2. Calculate th	e Strength of CH3CC	OOH Solution.	• Calculate the CH ₃ COOH::	Molecular weight o C = 12, H = 1, O =1
2. Calculate th	e Strength of CH3CC	OOH Solution.	• Calculate the CH ₃ COOH::	Molecular weight o
