Creativity Examples and Brainstorming

FALL 2022

Before We Start

- With a simple "twist", you can transform a "nothing" to "everything"
- Today's studio is simply a list of creative real-life examples to stimulate your thinking*
- In the second part of the studio you will be practicing brainstorming to generate creative ideas for your final project

"Nothing"

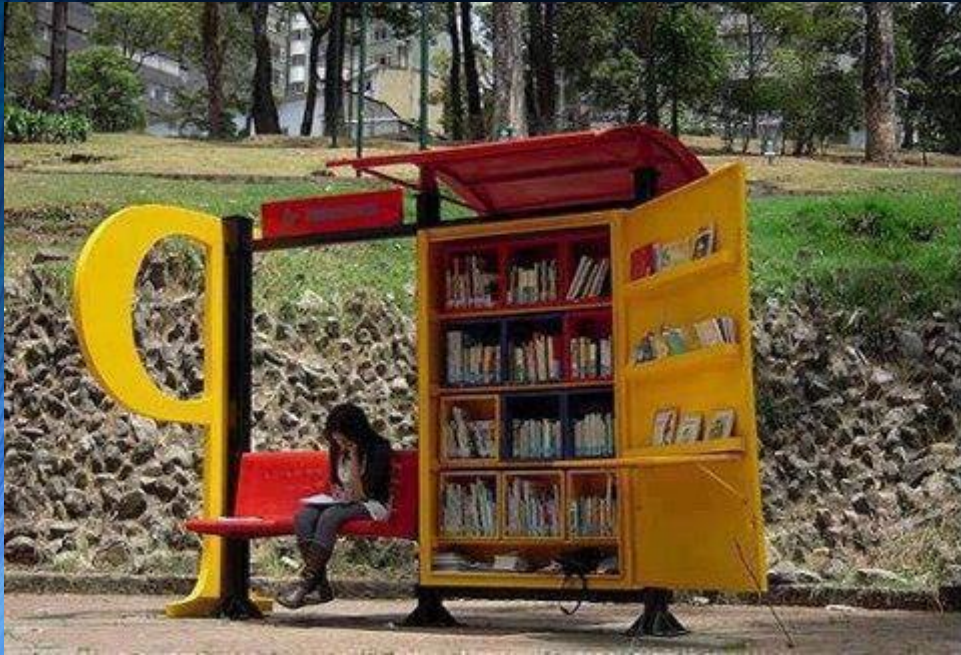

"Everything"

...AR CONDICIONADO É PROS SEM TALENTO.

- Now that you have seen some nice examples
- Brainstorm for some creative ideas for your final project
- Do not criticize during brainstorming

Guidelines:

- Generate as many ideas as possible; go for quantity (**30 min**)
- Select the best two or three ideas (**15 min**)
- Present your creative ideas to the class for feedback
