I have always been amazed at how things operate. I have a passion for learning, and the desire to find out scientific truths through medical research. I love my country and I strongly believe that Saudi Arabia has got what it takes to be successful. I thirst for new innovations that will be able to help not only my countrymen, but also the other individuals who are in need. Teaching and imparting my knowledge to my patients, students, and families are the best I can share to this world.
