

Cruciform Model

**Functional Zones**

The Rehabilitation Inpatient Accommodation Unit will comprise the following Functional Zones:

- Entry/ Reception area (may also be a shared area or provided at the Main Entry). Optionally, this area may incorporate a waiting area.
- Patient Areas - areas where patients are accommodated, and facilities specifically intended for the patients.
- Therapy areas - Gymnasium or multi-purpose areas where unit-based therapy and activities may be undertaken such as physiotherapy, occupational therapy, speech therapy, etc.
- Support Areas - areas used by staff to support the activities of the unit including utility rooms and stores.
- Staff Areas - areas accessed by staff, including administration and rest areas.
- Shared Areas - public and staff areas that may be shared by two or more Inpatient Units.

The above zones are briefly described here:

Entry/ Reception Area

The Reception is the receiving hub of the unit and may be used to control the security of the Unit. Optionally, gender separated waiting areas for visitors may be provided either immediately outside or immediately inside the unit. Waiting areas may be shared between 2 or even 3 adjacent Inpatient Units. This area needs access to separate male/female toilet facilities and prayer rooms. Optionally, visitor and staff gowning, and protective equipment may also be located immediately at the entrance for infection control in case ward isolation becomes necessary during a break-out.

Patient Areas

Patient Areas will include:
