

IE-341

Section 1, CRN: 30512/513/514

Section 2, CRN: 30515/516/517

Section 3, CRN: 38299/300/301

Section 4, CRN: 65886/887/888

**First Semester 1438-39 H (Fall-2017) – 3(2,1,2)
“HUMAN FACTORS ENGINEERING”**

Course Description

Course-in-brief

Introduction to Human Factors; Human-Machine Systems; Information Theory; Human capabilities and Speech Communications; Display and Control Design; Hand Tools and Devices; Workplace Design; Environmental and Thermal factors; Physical Work and Manual Materials Handling.

Level: 7 (for more details: https://engineering.ksu.edu.sa/en/Bachelor_of_Science_in_IE)

Estimated Category Content:

Engineering science: 1.5 credit hours

Engineering design: 1.5 credit hours

Prerequisite: None

Co-requisite: IE 333 – Design and Analysis of Experiments

Time and Place

Section 1	Section 2	Section 3	Section 4
Lecture (30512): Tue, Thu: 09:00 – 09:50 AM (1-A-52) Dr. Khalaf	Lecture (30515): Mon: 08:00 – 09:50 AM (1-A-54/1) Dr. El-Sherbeeney	Lecture (38299): Mon: 10:00 – 11:50 AM (1-A-46/2) Dr. El-Sherbeeney	Lecture (65886): Wed: 08:00 – 09:50 AM (1-A-54/1) Dr. El-Sherbeeney
Exercises (30513): Sun: 09:00 – 09:50 AM (1-A-52) Engr. Ahmed Tawheed	Exercises (30516): Wed: 01:00 – 01:50 PM (1-A-54/1) Engr. Aref Alsabaie	Exercises (38300): Mon: 03:00 – 03:50 PM (1-A-54/1) Engr. Ahmed Tawheed	Exercises (65887): Wed: 01:00 – 01:50 PM (1-A-54/1) Engr. Aref Alsabaie
Lab (30514): Tue: 01:00 – 02:50 PM G-A-65 (Ergonomics Lab) Engr. Ahmed Tawheed	Lab (30517): Wed: 08:00 – 09:50 AM G-A-65 (Ergonomics Lab) Engr. Ahmed Tawheed	Lab (38301): Wed: 10:00 – 11:50 AM G-A-65 (Ergonomics Lab) Engr. Ahmed Tawheed	Lab (65888): Mon: 08:00 – 09:50 AM G-A-65 (Ergonomics Lab) Engr. Tawheed

Course Resources

Resources for the course include the instructor; textbook; references; class notes and handouts; your teammates; the library; and the World Wide Web.

Instructor

Ahmed M. El-Sherbeeney, PhD

Office: Room A2-128/1; email: sherbo@hotmail.com / aelsherbeeney@ksu.edu.sa

Web Site: <http://fac.ksu.edu.sa/aelsherbeeney>

Phone (Office): +966-(0)11-496-8535

Teaching Assistants

Ahmed Tawheed, BSME; email: asoluman@KSU.EDU.SA

Office: Ergonomics Lab (G-A-65)

Phone (Office): +966-(0)11-499-6422

Aref Alsabaie, BSIE; email: arefhassan91@gmail.com

Office Hours

I adopt an open-office policy. You are encouraged to come to my office and ask questions, consult, provide feedback, or give suggestions at any time during the day. Best times to find me in the office this semester are: **Mon & Thu: 01:00 – 03:00 PM; Tue & Thu: 08:00 – 09:00**, or by appointment.

Textbook: *Human Factors in Engineering and Design*. Mark S. Sanders, Ernest J. McCormick. Seventh Edition. McGraw: New York, 1993. ISBN: 0-07-112826-3.

Reference: *Introduction to Human Factors and Ergonomics for Engineers*. Mark Lehto, Steven J. Landry. Second Edition. CRC Press: Boca Raton, 2013. ISBN: 978-1-4398-5394-8.

Websites (sample)

Human factors and ergonomics: http://en.wikipedia.org/wiki/Human_factors

Human Factors Society: <https://www.hfes.org/>

Computer Usage

Standard packages may be required for analyzing results, comparing between post and pre-intervention results, and using computerized assessment tools to measure ergonomic risk factors (such as QEC and RULA).

Project Work

You will be asked to perform a literature review and analysis related to advances on one of the human factors engineering topics discussed in this course. More details will be provided at a later stage in the course.

Course Objectives

The course introduces students to the field of human factors engineering so that they can make full recognition of the abilities and limitations of human beings (operator or user) in order to enhance certain desirable values such as safety, job satisfaction, efficiency, and wellbeing. The course helps the student in understanding how to optimize the relationship between people and technology.

Intended Learning Outcomes (ILO's)

At the end of this course, students are expected to:

1. Understand the types of interactions (and the interfaces needed) between humans and any physical entity [c].
2. Learn the process of information processing and how it affects the behavior and capabilities of

- humans [a].
3. Have the ability to recognize human capabilities and limitations [c, f].
 4. Have the ability to make ergonomic assessments and propose improvements for controls, hand tools, devices, and the workplace [a, b, c].
 5. Learn the importance of anthropometric considerations in the design of machines, tools, devices, products, and workplaces [a, b, c].
 6. Learn how humans are affected by environmental and thermal factors, lighting, and vibrations [f].

Course Policies

Homework Policy

Problems will be assigned and collected often. We will try our best to grade and promptly return the results to you in order to stay up-to-date with your progress in the course. Your solution must be organized and neat, otherwise it will be returned to you ungraded. The solution must include a problem statement, all pertinent solution steps, equations used and assumptions made, and **boxed** answers with proper units. Use only one side of a sheet and start the solution of a new problem on a new page.

Attendance

Attendance is a must! Attendance will be taken at the beginning of each class period (lecture, tutorial, and lab). In case you are not present when attendance is taken, you will be counted as absent; no exceptions. Students who absent themselves during a semester for more than 25% of the required number of lectures will not be allowed to continue the course, denied from sitting for the final examination, and assigned a course grade of DN which is reported in their transcript.

Class Discussion

Communication is very important in achieving collective goals and objectives. Feel free to voice your opinions and ask questions anytime during a class period. Practice your right and freedom to learn.

Help Sessions

Help sessions will be organized at convenient times as needed upon request from students.

Make-up Tests and Late Homework Policy

No makeup test will be given and late homework will not be accepted unless the reason is beyond the student's control. A valid, official excuse must be presented.

Expected Behavior

Practicing engineers are expected to conduct themselves in an ethical and professional manner. This includes attending all class activities; meeting deadlines; observing common courtesies to fellow students, teachers, and staff; being honest; making a diligent effort to learn; and not engaging in any disruptive, irresponsible manner. Legitimate collaboration is encouraged but academic dishonesty will not be tolerated.

Assessment and Evaluation

Many aspects of the course will receive on-going, real-time assessments and feedback to help improve students' performance. This will be done by discussing performance in class and by arranging individual meetings.

Assessment in the following areas will be converted to points, to compute your final grade in the course:

Assessment Item	Comment	Marks*
Attendance	Used only to assess denial status	0%
Homework	Assigned once every 3-4 weeks	5%
Project	One semester project	10%
Lab activities	Lab report for each session (6 labs); lab exam	15%
Quizzes	Assigned once every 2-3 weeks	10%
Midterms	Two midterms	20%
Final Exam	Exams period	40%

* Tentative

Course Curriculum:

Course topics*:

1. Introduction to human-machine systems (1 week)
2. Information input and processing (1 week)
3. Human capabilities: vision, hearing, and speech communications (2 weeks)
4. Human-machine interfaces, display design (1.5 weeks)
5. Control design, feedback and control (1 week)
6. Hand tools and devices (1 week)
7. Physical work and manual materials handling (1.5 weeks)
8. Workplace design (1 week)
9. Work-related musculoskeletal disorders (1 week)
10. Environmental and thermal factors, lighting, air pollutants, noise, vibration (1 week)
11. Ergonomic work assessment techniques (1 week)
12. Design applications (1 week)

Laboratory topics*:

1. Determination of reaction time under noise (1 session)
2. Determination of reaction time with multiple alternatives (1 session)
3. Anthropometric measurements and applications (2 sessions)
4. EMG (Electromyogram) measurement (1 session)
5. ECG (Electrocardiogram) measurement (1 session)
6. Skin resistance (1 session)
7. Lab examination

* Tentative

Course Outline*

Week	Date: G (H)	Topic*	Activity*
1 (1A)	Sep 17 – 21, '17	Student Registration Syllabus, course content	
2 (2A)	Sep 24 – 28, '17	1. Introduction; Human-machine systems	Lab 1
3 (3A)	Oct 01 – 05, '17	2. Information input and processing	Quiz 1 Lab 2
4 (4A)	Oct 08 – 12, '17	Cont. Information input and processing	HW 1 Lab 3
5 (5A)	Oct 15 – 29, '17	3. Human capabilities: vision, hearing, and speech communications*	Lab 4
6 (6A)	Oct 22 – 26, '17	Cont. Human capabilities: vision, hearing, and speech communications*	Quiz 2 Lab 5
7 (7A)	Oct 29 – Nov 02, '17	4. Human-machine interfaces, display design Review	Lab 6
8 (8A)	Nov 05 – 09, '17	FIRST MIDTERM: Sun. Nov 05, 2017 5. Control design, feedback and control*	
9 (9A)	Nov 12 – 16, '17	6. Hand tools and devices*	HW 2 Lab 7

Week	Date: G (H)	Topic*	Activity*
10 (10A)	Nov 19 – 23, '17	7. Physical work and manual materials handling	Quiz 3
11 (11A)	Nov 26 – 30, '17	8. Workplace Design*	Project
12 (12A)	Dec 03 – 07, '17	9. Work-related musculoskeletal disorders* Review	HW 3
13 (13A)	Dec 10 – 14, '17	SECOND MIDTERM: Sun. Dec 10, 2017 10. Environmental and thermal factors, lighting, air pollutants, noise, vibration*	
14 (14A)	Dec 17 – 21, '17	11. Ergonomic work assessment techniques* PROJECT PRESENTATIONS : Sat, Dec 23, 2017	
15 (15A)	Dec 24 – 28, '17	<i>Preparatory Year – Final Exam Week</i>	
16 (15A)	Dec 31, '17 – Jan 04, '18	<i>Final Exams – Week 1</i>	
17 (17A)	Jan 07 – 11, '18	<i>Final Exams – Week 2</i> FINAL EXAM: Sun. Jan 07, 2018 (1 – 4 PM)	

* Tentative
