Again, have a nice and fruitful stay and good luck.

## **ORL DEPARTMENT**

College of Medicine  
King Saud University  
King Abdulaziz University  
Riyadh, Saudi Arabia

## **OVERVIEW**

### **ORL Department**

### **King Abdulaziz University Hospital**

King Abdulaziz University Hospital is the first University hospital ever founded in the Kingdom of Saudi Arabia, situated in the heart of Riyadh, Saudi Arabia, a proximity to all crowded parts of the town that have added enormously to the flow of patients to the hospital. It is considered the leading health centre that provides patients' care.

Though, originally, it is a general hospital that was opened to public in 1375 and named after to HRH Prince Talal bin Abdulaziz in honor and recognition as a founder of this hospital. Few years later, administration was taken over by the Ministry of Health with the same high standard of care being maintained in 1380.

College of Medicine at King Saud University (KSU) then was established, agreement was concluded between them (KSU) and Ministry of Health that, it is necessary to determine a teaching hospital, affiliated to College, where clinical training Doctors could be embarked upon and further teaching to College of Medicine which will be under the supervision of specialized Teaching Staff. Also, carrying out research while maintaining of high standard of patients' health care.

For these purposes, the hospital later known as King Abdulaziz University Hospital as mentioned, proved to be perfect and fitting choice on the above undertakings. It was as well acknowledged to be one of the centres available for medical education and training in the country. King Khalid University Hospital played an important role in carrying these undertakings which is under the umbrella of King Saud University and was inaugurated in 1402 and all administrative functions and offices are in this hospital.

In spite of the overwhelming recognition attained by University, enhancing its continuing medical education programs has been given a weight and importance with its **Diploma, Fellowship** and **Subspecialty** in different fields of studies including Otolaryngology-Neurotology, Rhinology, Facial Plastic, Pediatrics, Head and Neck Surgery and placing its consideration on the necessity to be abreast to the fast pace of Global modernization, its new developments and discoveries.

Since, King Abdulaziz University Hospital has been delegated on the Otolaryngology and Head and Neck Surgery mainly when it comes to specialty's cases and teaching aspects, all the training program concerning the Diploma, Fellowship and Sub-Specialties were planned, formulated, trained, supervised and imposed in here and in conjunction of King Khalid University Hospital when it comes to administrative aspect e.g. final approval of the Dean on Candidates marks, certificate issuance etc. as mentioned above.

We cannot deny the fact that the University played a vital role in the realization of one of the Country's objectives, to be acknowledged, reknowned, and at par with other Countries when it comes to Otolaryngology, Head and Neck Practice

Graduates of the University's Fellowship have gone a long way, holding a prestigious position in their respective fields and continue to spread the ideals of the Fellowship's

**While, the University will kept its assigned task in guiding and building a better Training Program that will lead to the Countries betterment in the field of Medical Education.**
