

Riyadh Bookstores

- Abdulrhman Alenazi
- Rashed Alsholighem
- Salman alsuby
- Hamad Aldusimani

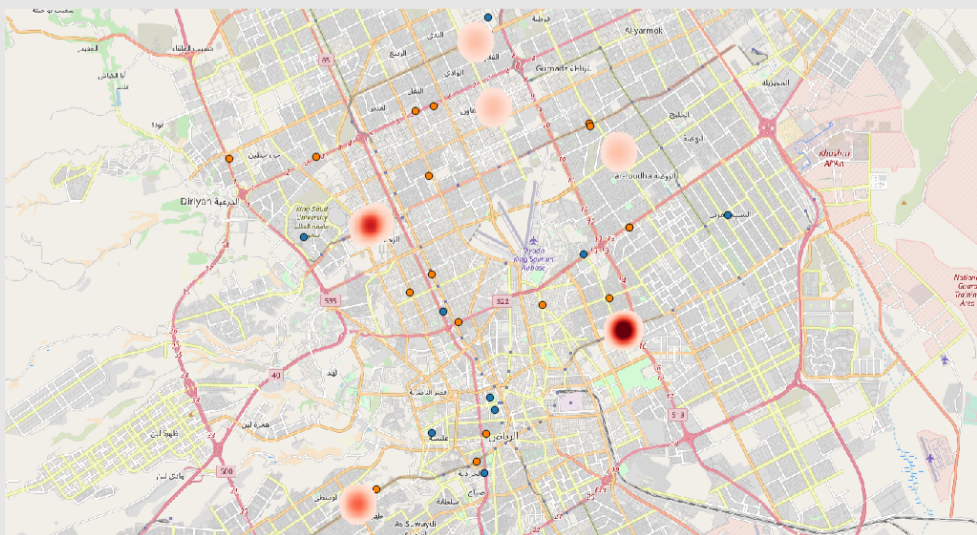

Problem Description

- Facilitate the search for bookstores in one place.
- Facilitate the distribution of used Bookstores to help individu-

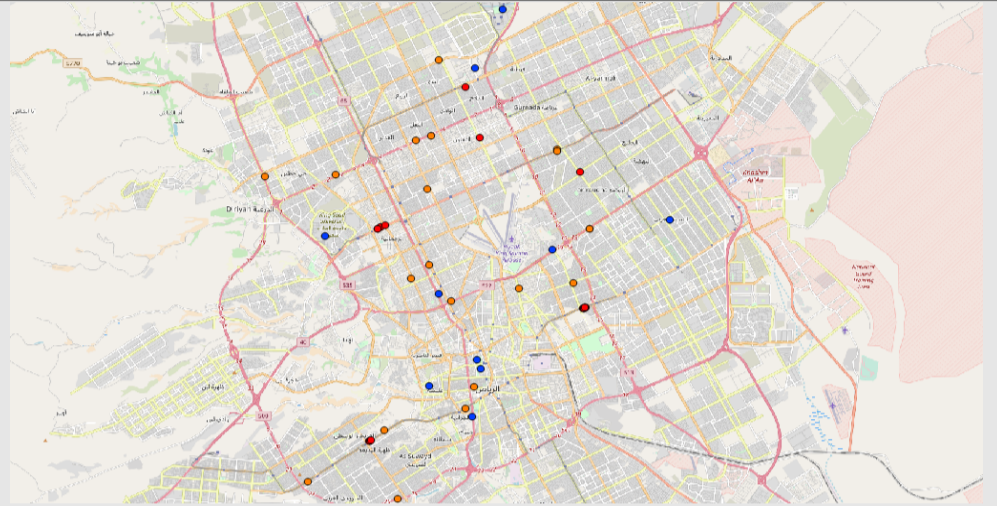

We use two function in our maps :

- 1-In buffer The distance 2km
- 2-In heat maps use
 - A- 1-2 Light color
 - B- more than 2 to 4 more darker and less lighter
 - C- More than 4 more darker color

Heat Map Analysis

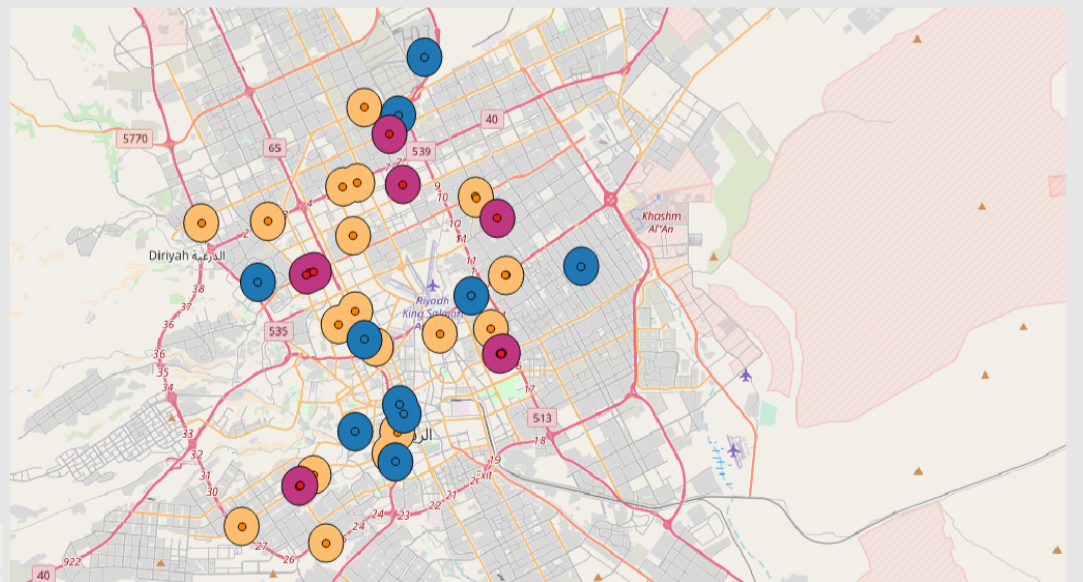

Main Map

Data description

- The source in this project is workers in each bookstore.
- we used google maps to collect points also we went to search by our self.

Buffer Analysis

Main conclusions

There is many used bookstores near the universities but there is many neighborhoods that is in need.
