King Saud University
College of Architecture & Planning
Riyadh
Saudi Arabia

Position
Assistant Professor

Date
April, 2017

Hello,

My goal is not to achieve educational labels such as "PhD" for the own sake, since I now understand that these are simply tools in achieving what I believe to be much grander goals. I hope the training and the scientific knowledge I will acquire along my journey can help me contribute to the world through continued discovery and innovative ideas.

I hope to broaden my knowledge and understanding of Architecture, Engineering and Construction (ACE) by collaborating with your outstanding firm. I believe that having a multidisciplinary training in AEC, economic evaluation and decision making will give me a different outlook which I hope I can share with my fellow mates at your firm.

Therefore, I enthusiastically look forward to collaborate with your outstanding firm, to build upon the solid foundation of knowledge I have gained at this point in my career, and in so doing, reach my full potential as a professional and an academician.

If additional material or information is required I am more than happy to submit them to you. I truly look forward to the opportunity of discussing my application with you further.

I thank you for your consideration and look forward to hearing from you soon.

Yours Sincerely,

Fahad S. Allahaim

Fahad Saud Allahaim

ABOUT

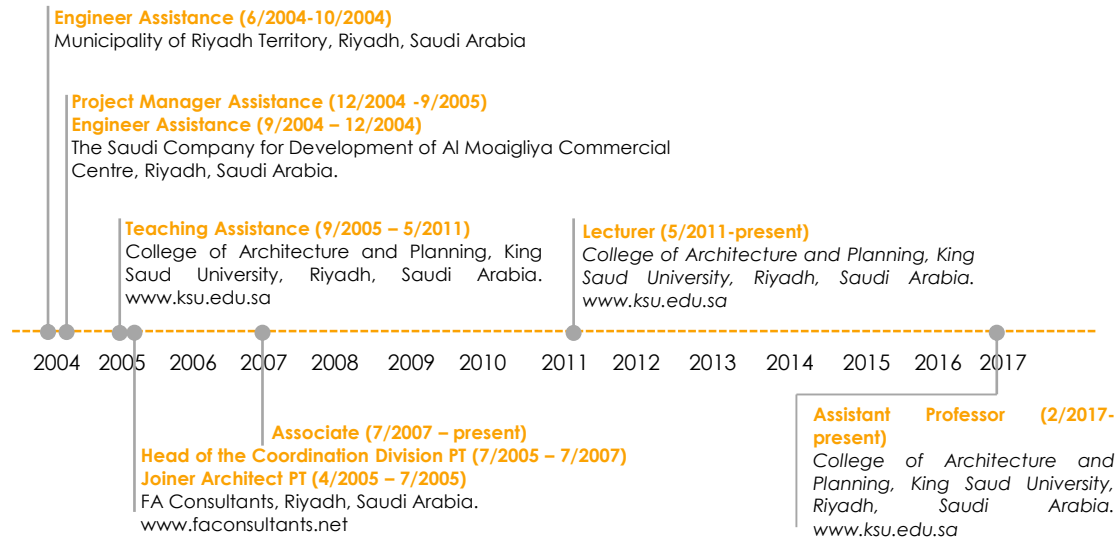

My journey in both the academic and professional fields has evolved to challenge traditional boundaries between Architecture, Engineering and Economics. The research I have been involved in defines an interdisciplinary zone, within which opportunities, strategies, and intellectual foundations are developed. During my academic and professional career, I have participated in several papers, presentations, symposia, and workshops.

EDUCATION

- PhD, Architectural & Engineering Economist** 2011-2016
School of Civil Engineering, Faculty of Engineering and IT, The University of Sydney, Sydney, Australia.
