Good programming practice:

- ✓ **Start your program with a comment**
- ✓ **The last character printed in any output statements should be a new line**
- ✓ **Indent your code to make it more readable**

Q1. Edit, compile and run the following program, and observe the output produced.

```cpp
#include<iostream>
using namespace std;
int main()
{
        cout<<"Welcome to C++ programming 1436\n";

        return 0;
}
```

EVALUATION

Q2. Write a program that print your full name in a line and your ID number in another line.
